Subject: PHP Developer

Dear Mixvoip Hiring Manager,

I am very eagerly writing to express my interest in this position for PHP Developer. Since moving to Luxembourg in September 2021 I have only heard fantastic things about Mixvoip as a workplace and the integrity the company has in relation to its provision of products and services. As someone who studied law the anti-fraud warranty is something I really support. I would be very excited to start my career in web development at dynamic company that values inclusion and the opinions of all its employees.

I am currently enrolled in the NumericALL CodingJobs Bootcamp which is a 490-hour training in Full-stack web-development. Since starting the Back-end portion, I have really fallen in love with the elegance of PHP.

Before the training, I had really thrown myself into web development - completing many trainings by organisations here in Luxembourg (e.g., Women in Digital Empowerment, Huawei, and NumericALL) and even winning my first hackathon!

After moving to Luxembourg in 2021 (after self-studying coding for a year) I started the Luxembourg Codecademy Chapter which holds virtual study sessions for anyone anywhere. Since starting, we've grown to 24 members, from all over the world - including USA, Saudi Arabia, Nigeria, and of course Luxembourg.

I want to join Mixvoip as a PHP developer because the company's values and principles very much resonate with my own. I fully intend to bring my team-spirit and excitement for coding along with me. I understand that I would be brought on as a Junior, but I am very motivated to learn as much as possible as quickly as possible from some very accomplished people. As part of the CodingJobs training, a Mixvoipie and alumnus of CodingJobs came to speak with us and he spoke so highly of the company that it was impossible not to want to join.

I appreciate the time taken to review my application and I hope to hear back soon.

Sincerely,

Betty Spurgeon
