Formation
« Junior Web Developer / CodingJobs »
Web and mobile developer

With ADEM, boost your career and become a junior web developer.

The skills base you will acquire during this training will allow you to apply for a position as a web developer in a web agency, a large company, an SME, or a start-up.

Training content

- **HTML5/CSS3:** website integration in compliance with standards
- **JavaScript:** develop interactive web pages
- **React :** build high-quality user-interfaces for web apps
- **MySQL :** design and operate on databases
- **PHP:** server-side scripting for back end development
- Object oriented programming: improve the productivity, modularity and clarity of code
- **Laravel :** develop a scalable application using an MVC/PHP framework

Target group

Jobseekers registered with ADEM who wish to direct their careers towards the new professions in web technologies.
